

Bioenergy in South Carolina

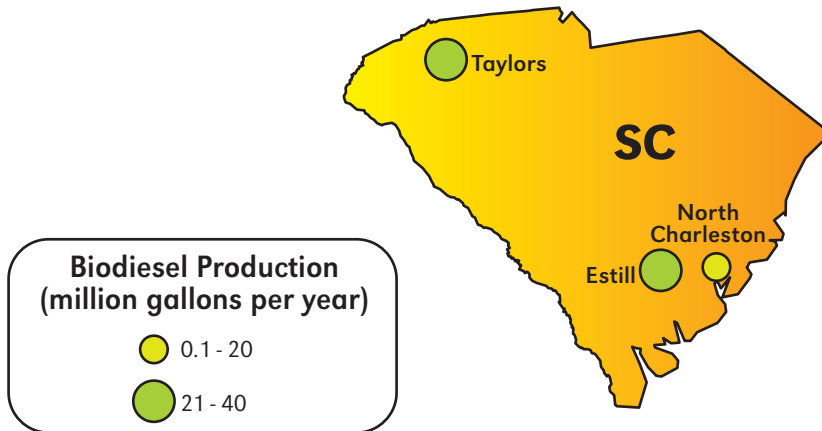

from the Southern Bioenergy Roadmap

The Southern Bioenergy Roadmap established that the South is in a unique position to create thousands of jobs through applying abundant natural resources and intellectual capital to the production of electricity and automotive fuel from plants, trees and waste – also known as biomass. Download the report at <http://www.saferalliance.net/projects/roadmap.html>.

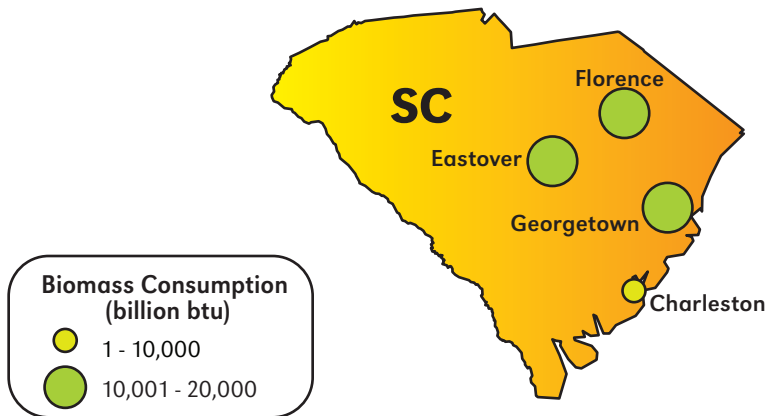

Locations and capacities of current biodiesel plants

There are no ethanol plants in South Carolina.

Bioenergy Research Assets

- ◆ Arborgen
- ◆ Savannah River National Laboratory
- ◆ South Carolina Bioenergy Research Collaborative
- ◆ South Carolina Biomass Council
- ◆ Sustainable Institute for Energy Studies, Clemson University
- ◆ University of South Carolina

Direct and indirect economic contributions of biopower generation by heat and electric plants in South Carolina, 2007*

Revenues (Million \$)	Personal & Business Income (Million \$)	Employment (Jobs)
480	284	7,369

*Additional research needs to be done to assess current and potential economic impacts of biofuel plants.
